stant Commissioner for Patents

Ashington, D.C. 20231

<u>AMENDMENT</u>

Sir:

This is filed in response to the Office Action mailed December 26, 2000 in the abovenoted patent application. Please enter the following amendments and remarks.

In the Specification:

On page 1, after the heading "Abstract of the Disclosure," replace paragraph 1 with the . 1. following paragraph:

Disclosed is a method of regulating the expression in a human or animal subject of a nucleic acid sequence encoding a polypeptide which is immunogenic in the subject; the method entailing introducing into a mammal a cell containing the nucleic acid sequence encoding the immunogenic polypeptide, the sequence being operably linked to a drug-regulatable promoter; and altering the concentration of regulatory drug to which the cell is exposed.

Replace paragraph 2, on page 7 (lines 9-17) with the following: 2.

BRIEF DESCRIPTION OF THE DRAWINGS Figures 1A and 1B are schematic representations of nucleic acid constructs referred to in the

example below.
